***FREE REVIEW*
BY ONE OF AMERICA'S LEADING
STEM CELL PHYSICIANS**

Let's be honest: "Stem Cells" might sound really exciting ... but most doctors and almost all patients have important misunderstandings – confusions! – about what people mean by the terms. Time to erase these frustrating ... often weird terms.

Two dozen years ago, we started hearing about "stem cell research." But many of those studies were done on "embryo cells" (the first steps in developing humans) – *not good*. Now the world has *completely* changed ... *for the better!*

More recently, techniques have been devised to "suck out" and isolate your *own* "stem cells" found in body fat: your belly, your butt, your bone marrow (*ouch!*). You might have heard of "liposuction" to reshape your belly or hips or whatever – this process is very similar. Your "fat solution" is processed "in the back room," expecting to concentrate your "stem cells" for injection. (What *are* stem cells? Your body has these special cells "nested" here, there, everywhere, available since your birth to help heal when you later get injured.) The FDA has important questions ... full "operating room" sterile technique is expected *and* ... what procedures are used to separate your cells from your fat and "treat" them? Also ... your own cells are older and now less enthusiastic than you would like.

A number of other "tissues" are offered by various practitioners, sometimes in "shopping center" clinics, but these can have very worrisome risks – and most of them contain *no* "stem cells" or simply *dead* cells or *no* cells at all. **Buyer beware** – *this ain't no bargain!*

Our program is completely different! – Let’s clear up one confusion right away: You want someone with excellent clinical experience providing a safe, effective, youthful, alive, *real* “guaranteed stem cells” solution that can go to work to help you heal literally within seconds. We get ours from a federally registered tissue bank, with tight quality controls inspected by the FDA. They are collected from volunteer mothers undergoing clean (C-section) deliveries, where both mother and baby are tested and cleared – and the cells *you* receive come with a “graduation certificate,” insuring that their batch has passed continuing quality controls. Want more details? Get our excellent book, **Failure is *not* an Option** – **DIAL 1-800-FIX-PAIN** for your copy.
